

Class 5th

Weekly Task: Math

Exercise 3.4

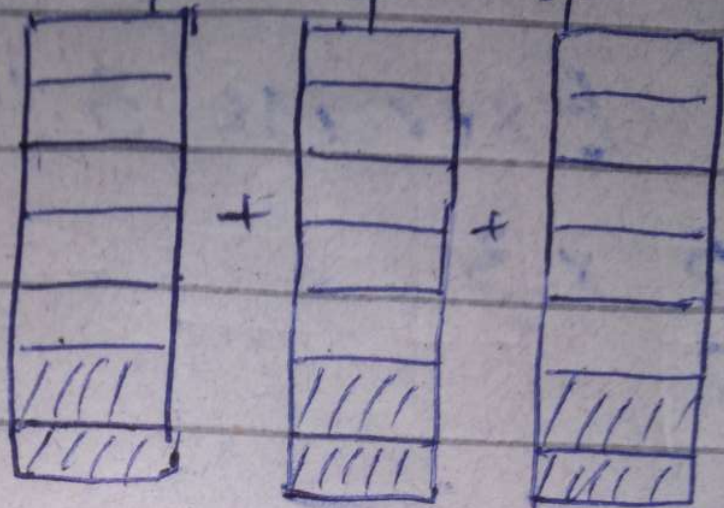

Q4: $\frac{5}{12} \times 3$

$$\frac{5}{12} \times 3 = \frac{5}{12} + \frac{5}{12} + \frac{5}{12}$$

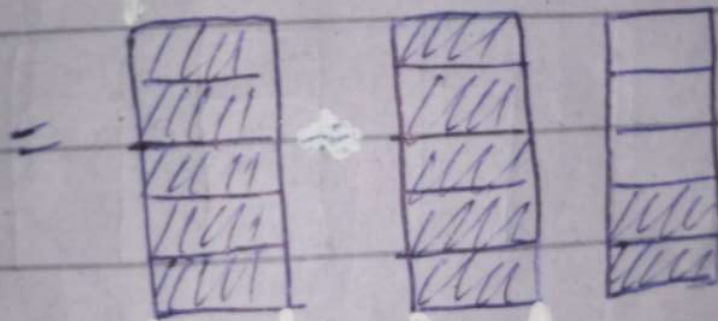

Q5 $\frac{2}{7} \times 3 = \frac{2}{7} + \frac{2}{7} + \frac{2}{7}$

$\frac{2 \times 3}{7}$

= $\frac{6}{7}$

$$Q6 \quad \frac{3}{5} \times 4 = \frac{3}{5} + \frac{3}{5} + \frac{3}{5} + \frac{3}{5}$$

$$= 1 + 1 + \frac{2}{5}$$

$$= 2 \frac{2}{5}$$

Q7 $\frac{2}{3} \times 5 = \frac{2}{3} + \frac{2}{3} + \frac{2}{3} + \frac{2}{3} + \frac{2}{3}$

$= 1 + 1 + 1 + \frac{1}{3}$

$= 3 \frac{1}{3}$

$$Q9 \frac{5}{9} \times 8 = \frac{5}{9} + \frac{5}{9} + \frac{5}{9} + \frac{5}{9} + \frac{5}{9} + \frac{5}{9} + \frac{5}{9} + \frac{5}{9}$$

$$= 1 + 1 + 1 + 1 + \frac{4}{9}$$

$$= 4 \frac{4}{9}$$

Q 10 $\frac{1}{3} \times 5 = \frac{1}{3} + \frac{1}{3} + \frac{1}{3} + \frac{1}{3} + \frac{1}{3}$

$$= 1 + \frac{2}{3}$$

$$= 1 \frac{2}{3}$$
